

InstallAnywhere 2018 SP1

Create multiplatform installations for physical, virtual and cloud environments

BENEFITS TO YOUR ORGANIZATION

InstallAnywhere delivers an ideal combination of ease-of-use and powerful functionality.

More developers choose us to build reliable and consistent installation for desktop, server, cloud and virtual environments.

Present installation text in up to 31 different languages for localizing installations.

You've built a great software product that users love. Why risk an installation error and a poor customer experience? Play it safe with Flexera's InstallAnywhere®. It's the leading multiplatform solution for developers creating installers for physical, virtual and cloud environments.

From a single project file and build environment, InstallAnywhere creates reliable installations for these on-premises platforms: Windows®, Linux®, Apple®, Solaris®, AIX, HP-UX and IBM®. Take existing and new software products to a virtual and cloud infrastructure, and create Docker containers—all from a single InstallAnywhere project.

Create Cloud-Ready Virtual Appliances

Advanced functionality enables you to take existing and new software products to a virtual and cloud infrastructure. Use InstallAnywhere 2018 to easily create cloud-ready, multi-tier virtual appliances to deploy multiplatform applications automatically to Amazon EC2, and create enterprise-ready, multi-tier virtual appliances to deploy multiplatform applications automatically (OVF 1.1 Compliant).

With InstallAnywhere 2018, you'll adapt to industry changes quickly, get to market faster and deliver an engaging customer experience.

The Result?

Productivity: up. Extra scripting/coding/rework: way down. It's just one more way we're raising the bar for installation.

"Not only was I able to create our installers on the same day that I downloaded InstallAnywhere, but each installer ran without errors on all platforms."

SHAWN CAMPBELL
—PRINCIPAL RELEASE ENGINEER, YANTRA

InstallAnywhere 2018 SP1 Feature Highlights

NEW

Installer Updates

Check for updates before the installation starts and choose configuration options — let users decide or enforce important updates.

NEW

Be Java 11 Ready

Support for Java 11, officially released by Oracle, is all set to build your favorite installers.

ENHANCED

Improved Designer Search

Stronger searching finds what you need fast — search your entire project for text or variables and navigate automatically to the referenced location.

“Customers access our products in increasingly complex environments – from physical, traditional environments to cloud and virtual environments and we need to make it easy for them. Flexera understands this. InstallAnywhere, with its easy-to-use interface, is the engine that enables Axway to deliver a seamless, consistent user experience when deploying Axway Secure Client on various operating systems in multiple environments.”

PAUL FRENCH
—VICE PRESIDENT, STRATEGY & MARKETS, AXWAY

Key Product Features

Support for Java 11

Be Java 11 ready and be more efficient. Quickly detect and automatically run Java 11 VM on the host or create and bundle Java VM packs.

Updated Designer Interface

InstallAnywhere2018 has a fresh, modern GUI to give you the engaging and professional experience you expect from the multiplatform installation leader.

Advanced Upgrade Capability

Create installers that can use a combination of upgrade, maintenance, and instance management functionality. On a machine with multiple instances, choose which operation to perform for each one, upgrade existing versions or run maintenance to add/remove features.

Create Java-based Installations for Multiplatform Applications, Including Windows 10

Save time by creating a single installation project to build installations for each of the platforms your applications support.

Support Latest Microsoft Certificate Requirements

Support signature requirements for SHA-256 certificates and digests.

Advanced UI Designer

WYSIWYG designer for installation panels makes it fast and easy to create appealing, DPI-aware installations. Designs can be saved as templates and reused to ensure consistent branding across all your products.

Rules Manager

Simplify the development of multiplatform installations by defining reusable platform rules that are automatically applied based on file types.

Install Dependencies from Linux® Package Managers

Implement Linux best practices and reduce steps for managing RPM and DEB prerequisites by installing dependencies from Linux package managers.

Install Databases to IBM DB2, Microsoft® SQL, MySQL®, and Oracle®

Simplify development of installations for complex applications by ensuring your installations can easily connect to the leading database servers: IBM DB2, Microsoft SQL, MySQL and Oracle. Built-in panels give your users the ability to easily connect installations to the database server.

Install Web Apps to Tomcat and WebSphere

Install web apps directly to Apache Tomcat and IBM WebSphere.

Build Docker Images from Any InstallAnywhere Project

Increase your deployment options and simplify installation development by automatically creating both Docker images and traditional platform installers from a single InstallAnywhere project. Share your Docker images and make your applications visible in the Docker Hub and private repositories.

Create Cloud-Ready Virtual Appliances

Reuse existing installation project information to simplify the process of creating Amazon Machine Images. These images can be shared with customers or deployed directly to Amazon EC2 to facilitate cloud migrations.

Enterprise-Ready Virtual Appliance Builds

Build faster and easier by creating virtual appliances directly from existing virtual machines.

Build Multi-Tier Virtual Appliances

Simplify evaluations and production deployments of multi-tier applications by bundling several virtual machines into a single enterprise-ready virtual appliance.

Silent, Console, and GUI Installations

Support for a wide range of deployment scenarios. InstallAnywhere installations support running silently, via console, or through graphical wizards.

Multilingual Runtime Support

Present installation text in up to 31 different languages for localizing installations.

Easily Create Upgrades

Simplify development and installation of upgrades with a standard framework to automatically detect and remove prior versions of your applications.

Automation Interface

Support continuous integration practices and reduce manual editing by leveraging automation scripts to edit, build, and test installations via Java APIs.

InstallAnywhere Standalone Build

Support continuous integration practices by building InstallAnywhere projects on a separate clean build system.
